EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the amendment to the specification starting at page 4, line 1, filed 8/30/05, "121" has been changed to --122-- in line 13 of the amended paragraph; and in line 14 of the same paragraph, "122" has been changed to --121--. These changes were made to be consistent with Figure 1 as amended in the replacement sheet filed 8/30/05, and claim 1.

2. The following is an examiner's statement of reasons for allowance: Although Figure 9 of the applied Fujii et al patent number 5313836 shows a mounting board have a flat level surface in first and second regions, a weight that is not as deep as the frame, and a stopper, the stopper is on the surface of the weight instead of the mounting board. Although it is known that a stopper could be alternatively placed on the mounting board instead of the weight, as evidenced by element 4 in Figure 8B of the same patent, no teaching or motivation was found that shows a stopper projecting from the top of a mounting board having a level top surface between first and second surfaces as defined by applicant's claim 1, combined with a weight having a bottom surface above the bottom of a frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
